

PRESS RELEASE

January 7, 2008

**TYGAR MANUFACTURING, LLC™ Announces the First Ever Integral Color
Designed Specifically for Extruded Concrete**

TYGAR Manufacturing™, LLC, the leading manufacturer of turnkey equipment packages for the landscape curbing industry, has formulated the industry's first integral dry color designed specifically for use in extruded concrete and curbing. With both cost-effectiveness and convenience in mind, TYGAR's colors are packaged in 1-lbs. bags so that contractors no longer have messy measuring problems. **CurbColors™** consists of the highest quality dry pigment, with 24 radiant colors formulated by TYGAR to match most any variation of curb style. The unique packaging, wide range of colors, and overall cost/benefit combine to make **CurbColors™** the most innovative color option for any curbing contractor.

With our **CurbColors™** and **Bengal TG1000 Curb Machine**, concrete and landscape contractors can now offer customers attractive and practical driveway and hardscape accents, such as Belgium block, driveway skirts, and inlaid stone surfaces. Utilizing TYGAR's exclusive processes and equipment, these aesthetic borders are extruded and stamped in less half the time, and at a fraction of the expense, as other hardscaping methods. As part of the package, specially designed molds and stamps can extrude various brick patterns, raised or inlaid stone with mortar joints, and other stone patterns, along driveways, walkways or patios, in up to 24 different colors.

TYGAR provides the most complete turnkey solution for contractors who wish to enter the highly profitable business of concrete curbing. All of our equipment packages include the **Bengal TG1000 Curb Machine**, the **SC1000 Sabertooth Sod Cutter**, a custom curbing trailer with attached concrete mixer, complete training & support, and all the necessary accessories to get started.
