

PRESS RELEASE

June 18, 2009

TYGAR Introduces a Revolutionary New Curbing Trailer

As possibly the most innovative addition to the curbing industry in years, TYGAR just rolled out the all new ProCurb™ Custom Curbing Trailer, a completely unique design that provides all the traditional functionality of curbing trailers, plus 50% more dry storage and a lighter weight frame. The ProCurb™ Series was designed by TYGAR in coordination with some of the industry's most experienced curbing contractors. The curbers provided invaluable advice that resulted in a number of revolutionary features never before seen on a curbing trailer. The features:

- **Cargo-style V-Nose Equipment Box:** 50% more storage than conventional trailers, stand-up height of 6'6", paneled with 3/4"plywood for shelving & tie-downs, with interior lighting.
- **Additional Open Storage:** large enough for a pallet of portland, wheelbarrows, yard scraps, and other equipment
- **Slideable Ramp:** the ramp services both the equipment box and open storage area and it doubles as a side panel when moving.
- **Heavy-duty Construction/Light-weight Engineering:** built stronger than conventional trailers, yet is 20% lighter and lower to the ground for easy loading and unloading
- **Exceeds Capacity of Existing Full-Size Trailers:** holds over 600 ft. of materials, up to a pallet of portland, much greater dry storage space, plus easy access to the attached mixer
- **The ProCurb™ Cub Trailer:** the new "Cub" style trailer just arrived and includes the same novel design on a 16' frame and will hold 350 ft. of material.

TYGAR Manufacturing, LLC, the leader in the landscape curbing market, provides the most complete turnkey equipment solutions for the curbing industry. All equipment packages include the Bengal TG1000 Curb Machine, the SC2000 Sabertooth Sod Cutter, a custom curbing trailer with attached concrete mixer, complete training & support, and all the necessary accessories.
